

Capability Statement

Introduction

We offer a full spectrum of support from IT services to information management, testing, and Training, which we tailor to meet the individual requirements of Federal, State and Commercial Organizations. We maintain a deep understanding of emerging and game-changing technologies so we can identify the areas of investment that will ensure state of the art capabilities. Partnering with academic and industry leaders we develop new solutions to support our future product strategies.

JMJ staff provide the experience and knowledge needed to deliver solutions on time, within budget all the time. Most hold advance degrees and certifications in the technical and management specialties. Our staff can work in any government or commercial environment to support our nation's needs.
